Prepurchase Information for Potential Buyer – Please fill out, sign, and fax back.

Date of Prepurchase Exam _____

Intended Use/ Level of Horse:

Name of Horse:

Buyer Name and Address:

Seller Name:

Phone: _____

Cell: _____

Fax: _____

Email: _____

Credit Card Name/ Number/ Expiration Date:

Note: It is a VEI policy to have credit card information prior to prepurchase examination date. Your credit card will be debited at the end of the day that the horse was discharged, unless you prefer to pay by check in person at the time of the discharge. By signing this information form, you authorize such a credit card debit (unless paid by check at the time payment is due).

Costs:

The items below will be performed at the pre-purchase examination:

- **Office call:** \$40.00
 In clinic fee.

- **Prepurchase Clinical and Moving Examination:** \$400.00
 The clinical examination begins with a comprehensive evaluation of the horse's respiratory, cardiovascular, musculoskeletal and gastrointestinal systems. During the moving evaluation, the horse will be examined at a walk and trot on a firm surface, and lunged at the walk, trot and canter in both directions on the lunge pad. In addition, flexions of the forelimbs and hind limbs will be evaluated.

Under the direction of the veterinarian, the horse may be observed under saddle; therefore, we recommend bringing tack to the pre-purchase examination as we do not have any spare tack at the clinic. Anyone who rides the horse will have to sign a waiver and must wear an ASTM approved helmet.

- **Lameness Locator** \$75.00
The Lameness Locator detects and quantifies body movement asymmetry in a horse using small, body-mounted inertial sensors and a hand-held tablet P.C.. Instrumentation of the horse is quick, easy and completely non-invasive. Data collection is in real time and veterinarians are free to perform their usual lameness exam without distraction. Data is then analyzed and interpreted to determine if any lameness not visible to the eye or multiple limb lamenesses are present.

- **Digital Radiographic Examination:** \$1000.00
Following the moving examination, the horse will proceed to radiographs. It is standard in our comprehensive pre-purchase examination, to remove the horse's front shoes in order to obtain the best quality radiographs of the front feet. Exceptions will need to be discussed with the veterinarian performing the examination. We do not provide a farrier on the premises, and arrangements to have the shoes replaced will need to be made elsewhere. More advanced diagnostics such as ultrasound or thermography may be indicated if swelling, thickening, or sensitivity of the tendons or ligaments is palpated.

A standard set of pre-purchase radiographs requires 32 views including: front feet/ navicular, all four fetlocks, and both hocks (this is a discounted package price-normal pricing for the same 32 views would be \$1344.00). More radiographs, such as the carpi and stifles, may be indicated depending on the clinical and moving evaluation.

Additional radiographs are priced as follows:

- \$42.00 per each additional view except for the following:
- \$300.00 Back radiographs
- \$300.00 Neck radiographs
- \$150.00 For each Stifle
- \$150.00 For each Shoulder

Digital radiographs can be provided upon request on a CD format. Printed radiographs are available at \$5.00 per film. All shipping charges will be at the buyer's expense.

****If radiographs accompany the horse and will be used instead of radiographs performed at our clinic, there will be a \$250.00 radiographic consultation fee.**

Please place a check mark in the boxes provided to indicate which services you would like performed at the pre-purchase examination.

A comprehensive clinical evaluation of the horse includes:

CBC/ Chemistry (Blood work): \$91.00

A complete blood count (CBC) is one of the most common blood tests performed to help diagnose various infections or other abnormal conditions of the body. A chemistry additionally provides information concerning muscle enzymes, kidney, liver, and other organ function. (Please allow 2-3 working days to get the results).

Drug Screen: \$125.00

The drug screen bloodwork is sent to Center For Tox Services in Arizona; therefore, results are often not available for at least 5-7 working days. In addition, we do not recommend storing serum for drug screens to be performed at a later date, as the testable medications may deteriorate in the sample and not provide accurate results.

There is a Fed Ex charge in addition for the drug screen. We have to ship it on ice overnight to the lab. \$60.00

Coggins Test: \$40.00

A requirement unless the seller can provide our clinic with a current copy dated within the past 6 months.

Video Endoscopy: \$100.00

Provides direct visual examination of the upper respiratory tract and helps enable diagnosis of such conditions as: laryngeal hemiplegia, aryepiglottic entrapment, pharyngeal cysts, and lymphoid hyperplasia.(not available at our Florida location)

- **Video of Moving Exam:** \$100.00
Includes video of clinical exam movement: straight, lunge on circle, and flexion exam. Specify VHS or Mini – DV format. NTSC only. (not available at our Florida location)pppp
- **Health Certificate** for out of state horse: \$35.00
- **Insurance Exam:** \$40.00
(Please complete insurance section below and attempt to have forms faxed to us ahead of time).

**These are recommended for potential three-day horse or other elite athlete.*

Insurance:

The buyer intends to insure this horse for (please circle below):

- Major Medical and Surgical
- Mortality
- Loss of Use – (If buyer would like Loss of Use, we would like to have a copy of the form so we can take appropriate radiographs) – In addition, a CBC and Chemistry may be required, as well as stifle radiographs.
- I do not intend to insure this horse.
